

Dangerous Goods Containers

Feature and Advantage

Our Dangerous Goods Containers come in standard 20' or 10' if you are needing a more compact solution for your dangerous goods. They comply with the Australian standards for storage and handling of flammable and combustible liquids, to keep your goods stored safely and securely along with the working environment safe from any spills or mishaps.

RJKM's dangerous goods containers are specifically designed to comply with industry standards on the safe keeping of dangerous goods. They are fitted with steel grid flooring, large vents, drainage valves and are completely lockable for the added safety.
